CONSUMER PREFERENCE OF ALUGBATI (MALABAR SPINACH) SPREAD: AS A BASIS FOR TARGET MARKET IDENTIFICATION

PRESENTED BY:
BELEN, JOSHUA M.
IMBIS, SHEMARA ASHLEE S.
SURABIA, MARY GRACE A.

INTRODUCTION

- Alugbati (Basella alba) is nutritious but underutilized.
- Many avoid it due to taste, texture, and limited preparation.
- Transformed into a convenient spread for bread and crackers.
- Supports SDG 12 & SDG 9
- Limited studies on Alugbati in spread form.

STATEMENT OF THE PROBLEM

Determine consumer preference for Alugbati Spread as basis for target market identification.

- Demographic Profile

Age, Sex, Civil Status, Occupation

STATEMENT OF THE PROBLEM

- Consumer Preference / Acceptability

Taste, Appearance, Aroma, Texture

- Significant Difference

Is there a significant difference in preference when grouped by profile?

SIGNIFICANCE OF THE STUDY

Consumers: Healthy & affordable spread

Future Researchers: Reference

Farmers: Extra income

Entrepreneurs: business / marketing

CONCEPTUAL FRAMEWORK

Input - Process - Output (IPO) Paradigm

INPUT

- Demographic Profile: Age, Sex, Civil Status, Occupation
- Psychographic Profile: Health Consciousness, Willingness to Try, Purchase Behavior, Attitude
- Alugbati Spread (Single Formulation)

→

PROCESS

- Preparation of Alugbati Spread
- Sensory Evaluation using 5-Point Hedonic Scale
- Collection & Statistical Analysis of Responses

→

OUTPUT

- Level of Consumer Preference: Taste, Appearance, Aroma, Texture
- Description of Potential Target Market
- Identification of Possible Product Improvements

METHODOLOGY

- Design: Quantitative, Descriptive, Single Formulation
- Respondents: 100, 18-55 yrs old, Purposive Sampling
- Instrument: Questionnaire + Sensory Form, 5-Point Hedonic Scale
- Procedure: Validate → Prepare → Taste Test → Tally
- Stats: Frequency, Weighted Mean, ANOVA (0.05)

THANK YOU!!
